SUMMARY

Passionate Frontend Developer crafting modern, scalable, and high-performance web experiences with React.js and Next.js. Skilled in building intuitive user interfaces, optimizing performance, and turning complex ideas into seamless digital experiences.

PROFESSIONAL EXPERIENCE

Mid-Level Frontend Developer 2025 – Present
Tuppl Kathmandu

- Develop and maintain scalable web and mobile applications using Next.js, React.js, TypeScript, React Native, and Expo.
- Contribute to end-to-end product development, from frontend architecture and API integration to cloud infrastructure and deployment.
- Configure and manage Google Cloud Platform (GCP) environments and production deployment workflows.
- Integrate Stripe payments, email services, and third-party SDKs.
- Develop cross-platform mobile applications and prepare iOS and Android releases.
- Work with modern development tools, Git workflows, and CI/CD practices to improve application delivery and maintainability.

Frontend Developer & Team Lead 2022 – 2025
Aarawan Media & Tech Kathmandu

- Led a team of 3–4 developers, overseeing frontend architecture, technical decisions, code reviews, mentoring, and project delivery.
- Architected and delivered scalable web applications using React.js, Next.js, JavaScript, and Tailwind CSS, establishing reusable components and maintainable project structures.
- Implemented complex API integrations using Axios and TanStack Query, including centralized error handling, token refresh, caching, and optimized data fetching.
- Developed real-time application features using WebSockets, including buyer-seller messaging and live seat reservation systems.
- Integrated payment gateways including Stripe and eSewa, supporting secure payment workflows and multi-currency transactions.
- Improved application performance, responsiveness, and maintainability through Core Web Vitals optimization, efficient rendering, and frontend architecture improvements.
- Established Git workflows, coding standards, and development practices while mentoring junior developers and coordinating cross-functional project delivery.

PROJECTS

Travo Nepal
Ride Sharing app
A ride-sharing and vehicle rental platform offering city-to-city rides, daily rentals, ride pooling, and self-drive services, with dedicated rider, driver, and agency applications.

Mymealcrates
Developed a location-based food ordering platform, integrating Stripe payments, Google Cloud infrastructure, third-party email services, and production deployment.
